

Guidelines for Application Review and Employee Selection

Project supervisors have the flexibility to design efficient selection processes using their informed judgement and keeping equity and fairness for all applicants in mind. This document includes some suggested guidelines to help project supervisors in the review of applications and selection of qualified candidates. The guidelines are presented in two sections: Tips and considerations for determining the selection process and application review and evaluation tools.

TIPS AND CONSIDERATIONS FOR DETERMINING THE SELECTION PROCESS

- Project supervisors are encouraged to keep the process as simple as possible based on the urgency and complexity of the project and the number of applicants.
- Project supervisors should identify the key skills and competencies that would be necessary or useful for the project and make sure those are sufficiently described in the project announcement. Project supervisor should also determine what application materials should be requested (e.g. resume, expression of interest, writing sample, etc) and how these will be used in the selection process.
- Project supervisors are encouraged to document the application review and selection process and use that information to provide feedback to unselected candidates, if requested.
- When there are a limited number of applicants (<5 for example), applicants who meet the basic eligibility requirements may be selected without being formally rated. However, the project supervisor should document how the candidates were differentiated in order to provide feedback to applicants.
- When project applicant pool is ≥ 10 , the project supervisor should score the applicants to determine if there is a stand out applicant or a logical break that reduces the pool for interviews. Highly qualified candidates will normally be determined based on the most logical break in scores as determined by the evaluation. When there is no logical break, the project supervisor may decide to interview all or some of the best qualified group. The project supervisor should document the basis for who is interviewed.
- If there are no qualified applicants, the project supervisor should determine if the applicant pool can be expanded or if no selection will be made.
- Interviews (of some or all applicants) may be conducted at the discretion of the project supervisor.
- If interviews are conducted the same interview questions should be ask of all applicants to ensure fair and equitable treatment.
